To highlight that all service members of the Multinational Corps Northeast form one family in spite of wearing twelve different uniforms, an extraordinary ceremony took place in Baltic Barracks on 14 September 2012, during which all service members put on a dark blue beret with insignia of Multinational Corps Northeast (MNC NE).

'You need to wear this beret proudly; it is a symbol of our team, community, cohesiveness, loyalty, ' said the MNC NE Commander Lieutenant General Rainer Korff during the ceremony held in Baltic Barracks.

Multinational character of the Corps, the most important idea lying behind its functioning, enables the soldiers from different countries to cooperate on a daily basis and exchange experiences. What is crucial, they establish friendly and family like relations which makes the work more efficient and pleasant at the same time.

Starting from 14 September 2012, all service members of the Multinational Corps Northeast have their own distinctive symbol next to the MNC NE crest worn on chest and shoulder.
