

**For the 3rd time the Szczecin International School (SIS) inaugurated the new school year. This year 117 Danish, German and Polish pupils started their education in the multinational school.**

Currently the school is home for about 117 children, 60% from soldiers' families living in Szczecin, 40% from families of other European Nations.

The curriculum of the school has been adopted from the British system and it is compatible with the Polish, Danish and German education system. The classes are conducted in English, and the educational authorities assure that the school provides internationally acknowledged final secondary examinations entitling to continue education abroad.

From the 1st September 2005 the SIS established its agency in Bydgoszcz to provide all soldiers, who served in NATO Joint Force Training Centre with the education service for their children.
