Thursday, 20 April 2006 00:00

From 20th to 24th April the Command Support Brigade of MNC NE is conducting Exercise Compact Green 06 within Baltic Barracks as well as in the West Pomeranian Region area.

During the first phase of this exercise the participants evaluate the connectivity between Baltic Barracks and two remote stations located in Walcz. Then, the group relocated around Walcz will work on an operational situation developed for the exercise. The exercise scenario ensures that the soldiers will train in different combat circumstances while maintaining the permanent satellite connection between the permanent Headquarters and coping with all technical or procedural challenges. Furthermore, the Compact Green 06 exercise will improve multinational relationships within and between the Command Support Brigade staff and Command Support Brigade of Signal Battalion from Walcz.

The Satellite Communications (SATCOM) system was established in Baltic Barracks a few months ago. The system is invaluable during a mission on a permanent contact. It can be maintained from the mission area wherever it might be, back to the Headquarters in Szczecin.
