Each year there is a special day during which it is obligatory for all children to be happy. It is the Children's Day when all adults put a lot of effort in order to make all children's dreams come true.

This year's Children's Day abounded in attractions, games and competitions. Our junior staff from Headquarters Multinational Corps Northeast could enjoy a sunny afternoon in the Jutland's Garden and have a lot of fun. Among the attractions there were different shows in order to pander young person's tastes such as horse-riding, karate or dance shows. The children from Szczecin International School prepared a special performance for this occasion. Moreover, there were also sport competitions and those children who wanted to display their talent could take part in a drawing competition.

All children enjoyed the time spent together and the only thing that probably came to their minds was the reason why they had to wait the whole year in order to take part in such an extraordinary event.
