

Multinational Corps Northeast would not be capable of working efficiently without the **Headquarters Company (HQ Coy)**

The main role of the HQ Coy is to logistically support the Corps in any possible way; it begins with keeping military guards and watches, goes on with messing, maintenance and administration of staff cars, welfare services, and ends with detailing soldiers for help to G Staff Divisions. The HQ Coy is directly subordinated to the MNC NE Chief of Staff, regardless of his nationality. However, in terms of tasks, cooperation is developed with the Chief of Headquarters Support. This subordination is especially related to some extra tasks referring, for example, to supporting the exercises, visits and any other peacetime activities performed by the Corps.

The HQ Company consists of a command group, a support platoon, a supply platoon and a guard platoon, with a total number of 140 personnel, both military and civilian.

It is important to note that, apart from close relations to the Headquarters Multinational Corps Northeast, the HQ Coy resembles a typical Polish military unit.
